

BookVerse API Documentation

BookVerse is an online book review application that allows users to register, browse books, and submit reviews.

Base URL

<http://localhost:3000/api/v1>

Authentication

This API uses **JWT tokens**. Protected routes require the access token sent as a Bearer header, refresh token sent as an httpOnly cookie. After login, the token is automatically attached to requests.

Response Format

Success:

```
{
  "success": true,
  "data": { ... }
}
```

Error:

```
{
  "success": false,
  "error": {
    "message": "Human readable error"
  }
}
```

Auth Endpoints
